Invited Talk: Simultaneous Rigid E-Unification and Formula Instantiation

Andrei Voronkov

University of Manchester
http://www.cs.man.ac.uk/~voronkov/

We give an overview of results on simultaneous rigid E-unification and the related problem of formula instantiation. We show how these problems arise in automated reasoning by the tableau method and in query answering for first-order formulas. Then we will explain techniques used to prove the known results on simultaneous rigid E-unification and formulate some open problems.
